AMSTERDAM INSTITUTE FOR
ADVANCED METROPOLITAN SOLUTIONS

WP2's Reach

Mess near bags:
-Reduces number of bags opened from birds and rats because of organic presence.
-**Risk:** might motivate residents to more forms of trash separation which cab generate more bags on the street.

Uncontained trash away from bags:
-Will decrease workload for cleaners & collectors.
-Increases cleaning efficiency of workers whilst reducing thoroughness of cleaning.
-Reduces waste buildup.

Mess near bins:
Gap:
-Does not affect underlying factors that generate typology:
- -'willingness to use bins'
- -'perceived importance of proper waste disposal'
- -'improper use of public bins'
